

# RapidCharge<sup>®</sup> Maintenance Module

Real-time measure of adaptor's cycles

Plan the maintenance operations of your adaptor to optimize uptime rate

- Can be used on new or existing Fives' adaptors
- Detailed tracking and analysis
- Optimizes maintenance costs for a low investment

RapidCharge® Maintenance Module is an easy-to-adapt tool to anticipate maintenance operations. It can be used on any configuration (retrofit or new machine), on most adaptors

RapidCharge® Maintenance Module provides real-time information on the readiness of the adaptor. Maintenance operations can be planned to avoid production stops.

#### REAL-TIME INFORMATION

- Real-time follow-up of filling cycles
- Preventive maintenance information provided directly on screen
- Helps to perform preventive maintenance and anticipate failures/stops

#### DETAILED TRACKING AND ANALYSIS

- Settings can be easily loaded and revised with a PC via USB link

#### EASY UPGRADE

- Easy to install on most adaptors, on new ones or retrofit
- Includes connectors with quick unplug to make maintenance easy
- Can be installed during the regular maintenance operations of your adaptor at Fives' workshop

#### OPTIMIZATION OF THE MAINTENANCE PROCESS

Without using the RapidCharge® Maintenance Module

Using an adaptor upgraded with RapidCharge® Maintenance Module
