

fives north american

The world's foremost combustion systems for Iron Ore Pelletizing

- Low pressure and high pressure atomization for liquid fuels
- Custom designed fuel tubes for high to low Btu gases
- Systems designed to minimize cold secondary air

Supplying high efficiency inspired burner systems to the iron ore industry. We continue to offer the most efficient and reliable systems for burning fuels from the heaviest residual oil to low Btu gases.

Over 70 pelletizing burner systems installed worldwide.
