Heating Systems for the Gypsum Industry

- Project Management and Engineering
- Professional Commissioning
- Fabrication and Refractory Services
- Installation

Optimized combustion leads
to higher earnings

Board Dryers, Flash Calciners and Air Heaters

- More production from reliable, uniform process heating
- Low cost of ownership with less chamber maintenance
- Better process control with wide operating range
- Ultra low emissions and high process efficiency

Calcining Kettles

- More production with less fuel by precise heat control
- Lowest NOx and CO emissions without production loss
- Single and dual burner arrangements
- Complete kettle repair and installation
