

Induction heating for Aerospace Industry

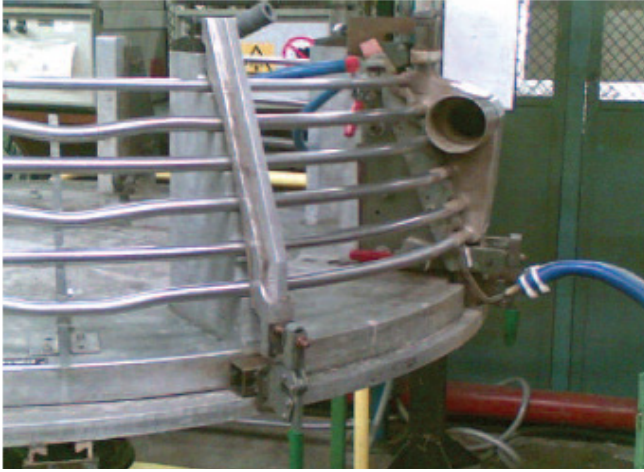

Fives, approved solutions by major industrial groups

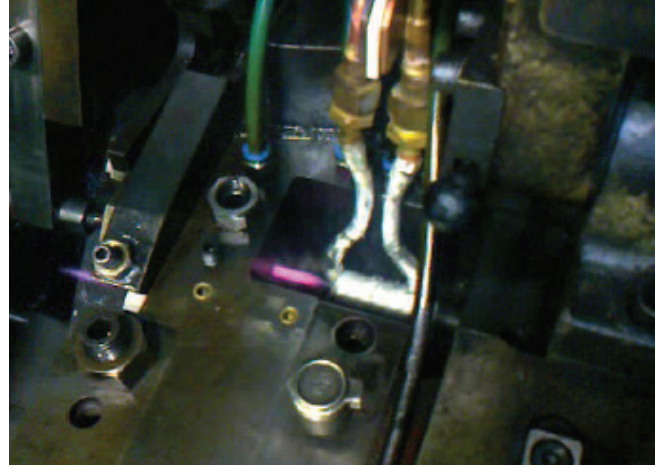

Aerospace industry is continuously subject to regulation evolutions, which impose them to adapt their manufacturing tools accordingly. Therefore it is fundamental for the aerospace industry to have partners able to support them, proposing solutions in compliance with their requirements..

Specialized since 1967 in electrothermic induction, Fives Celes creates specific induction systems, in order to fulfill clients requests.

Liquid tubing brazing

Hot-stamping

Fastener forming

Blade heating before recharging

Shrink fitting
